

# SilverScript® Insurance Company Employer Group Waiver Plan (EGWP) Formulary Drug Removals

Below is a list of medicines by drug class that have been removed from SilverScript EGWP Medicare Part D and/or enhanced coverage formularies, with alternative formulary options. This list represents drug removals in the Standard Exclusion offering.

Formulary Drug Removals in **bold** are new exclusions for 2025.

## Critical Reminders

It is very important to list all preferred brand formulary alternatives on any communications to members, prescribers or external parties so that each product in each category is represented equally. Listing only a subset of the preferred branded formulary agents or only generics when there are branded formulary products may result in nonpayment of rebates by the pharmaceutical manufacturer, and possible required adjustment of rebate guarantees for any drug that was disadvantaged or not treated equally. This applies to letters as well as printed and posted drug lists.

CVS Caremark® takes no responsibility or ownership for the content of the document if any alterations, intentional or unintentional, or other manipulations are made to this document. Any deviations from this representation of alternatives (either addition or removal of alternatives represented) should be reviewed and approved prior to any external communication. This document contains confidential and proprietary information of CVS Caremark and may not be distributed or copied, in whole or in part, without written

The formulary may change at any time. You will receive notice when necessary.

Mavyret: For patients with genotypes 1, 2, 3, 4, 5, or 6 chronic hepatitis C virus (HCV); or for genotype 1 infection previously treated with an NS5A inhibitor or an NS3/4A protease inhibitor, but not both.

This list represents brand products in CAPS and generic products in lowercase italics. This list is subject to change. Removed drugs and suggested alternative drugs and alternative drug copay tiers may vary depending upon the enrollee's EGWP formulary. Alternative drugs are on the Medicare Part D formularies, unless otherwise noted. There may be additional plan restrictions. Only the prescriber can determine if an alternative drug is appropriate for a Medicare Part D enrollee given the individualized nature of the drug therapy. This is not an all-inclusive list of non-formulary drugs or available drug options. For specific formulary information and additional alternatives, refer to the enrollee's EGWP benefit plan and formulary.

This list indicates the common uses for which the drug is prescribed. Some drugs are prescribed for more than one condition. This information is not a substitute for medical advice or treatment. CVS Caremark assumes no liability whatsoever for the information provided or for any diagnosis or treatment made as a result of this information.

An exception process may exist for specific clinical or regulatory circumstances that require coverage of a removed medication. Subject to applicable laws and regulations.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with CVS Caremark. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the doctor. Your privacy is important to us. Our employees are trained regarding the appropriate way to handle your private health information
